Finished board and thickness

RIVER PRACTICE BOARD | REV A | mm | 8 NOV 2026 | DIMENSIONS GOVERN

Side elevation after flattening

Materials from left
P01 maple
P02 walnut
P03 maple
P04 walnut
P05 maple

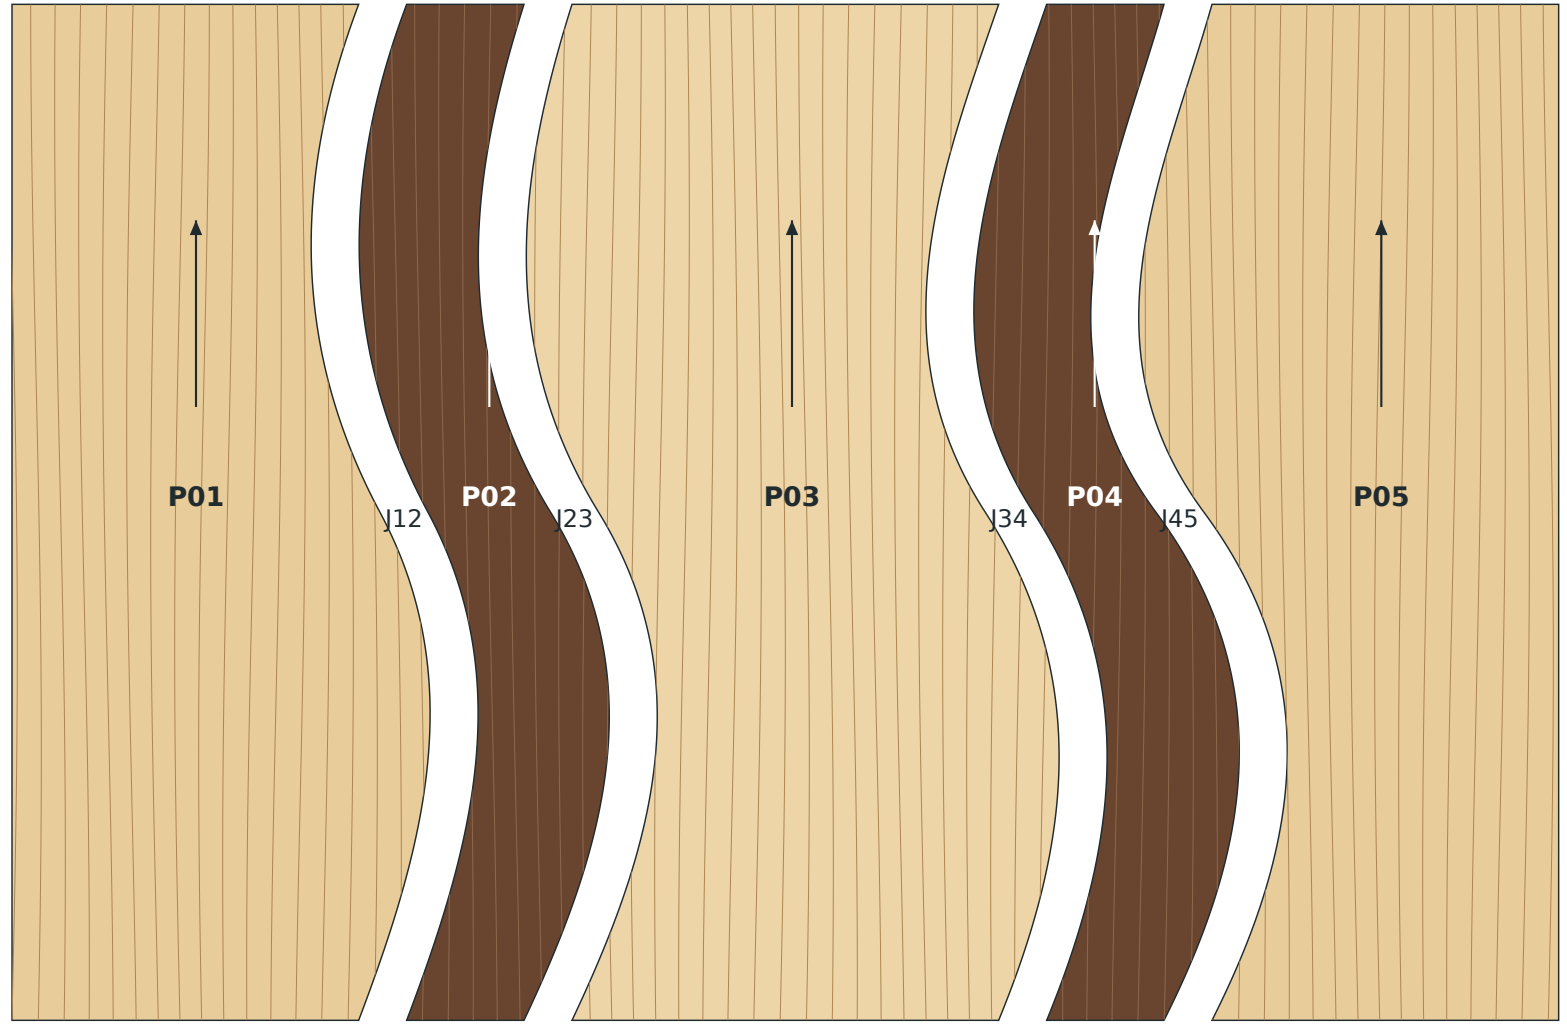

Grain
Arrows show +Y on every part. Face grain is exposed.

Glue interfaces
J12, J23, J34 and J45 are shared nominal curves. No CAM radius compensation is embedded in the CAD.

Source of shape
Four original two-span cubic Bezier boundaries, exported as editable sampled vectors.

Exploded assembly and machining allowance

RIVER PRACTICE BOARD | REV A | mm | 8 NOV 2026 | DIMENSIONS GOVERN

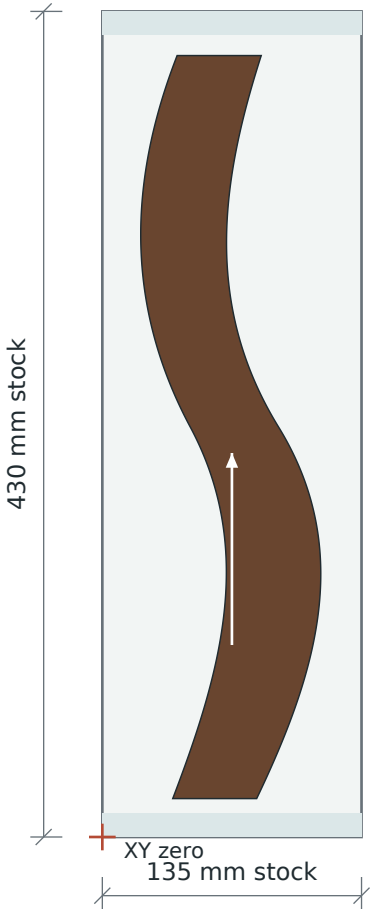

Pretrim assembly: 514 x 387 x 28 mm before glue-up flattening. Only the outside perimeter has 3 mm trim stock; the joints are nominal.

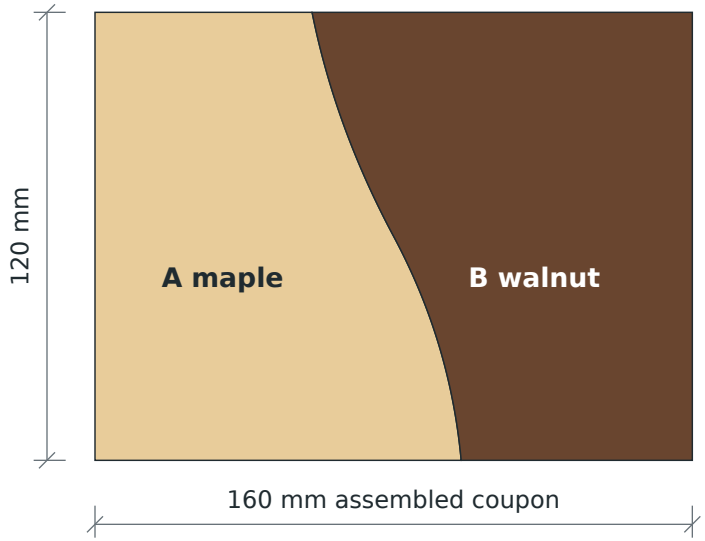

Final assembly: 508 x 381 x 25.4 mm. Glue in P01 to P05 order with a common end datum and cauls. Finish after cure. Tabs belong in the removable end strips, never on a glue interface.

Stock setup example and short joint coupon

RIVER PRACTICE BOARD | REV A | mm | 8 NOV 2026 | DIMENSIONS GOVERN

P02 walnut stock example
135 x 430 x 28 mm. Part length is 387 mm. XY zero at stock lower-left, Z zero at stock top. Shaded end bands illustrate fixture keep-outs only; they are not an engineered clamp layout.

Coupon is full scale
The middle 120 mm of J12 is reused exactly. Cut A and B in separate jobs. Compare B outside-profile allowances of 0, -0.025 and -0.050 mm with A nominal. Actual results must be measured.

Coupon	Blank X x Y x Z
A_Maple	140 x 160 x 28 mm
B_Walnut	145 x 160 x 28 mm
